

WHAT IS CLAIMED IS:

1. A polarizing plate comprising a polarizer, the polarizer comprising:  
a first portion having a polarization degree of 99% or more at each  
wavelength of light for wavelengths of 420 to 550 nm, and  
5 a second portion having a polarization degree of 99% or more at each wavelength of light for wavelengths of 550 to 700 nm,  
wherein the first portion and the second portion are laminated.
- 10 2. The polarizing plate according to claim 1, wherein the first portion and the second portion are laminated by an adhesive.
- 15 3. The polarizing plate according to claim 2, wherein a refractive index of the adhesive is in a range of 1.46 to 1.52.
- 20 4. The polarizing plate according to claim 2, wherein the adhesive is a polyvinyl alcohol-based adhesive.
- 25 5. The polarizing plate according to claim 2, wherein the adhesive is a urethane-based adhesive.
- 30 6. The polarizing plate according to claim 1, wherein the first portion and the second portion are laminated by a pressure-sensitive adhesive.
- 35 7. The polarizing plate according to claim 6, wherein a refractive index of the pressure-sensitive adhesive is in a range of 1.46 to 1.52.
8. The polarizing plate according to claim 1, wherein the first portion having a polarization degree of 99% or more at each wavelength of light for wavelengths of 420 to 550 nm and the second portion having a polarization degree of 99% or more at each wavelength of light for wavelengths of 550 to 700 nm are laminated so that the absorption axes are disposed in parallel to each other.
- 35 9. The polarizing plate according to claim 1, further comprising a reflector or a transreflector attached to the polarizing plate.

10. The polarizing plate according to claim 1, further comprising a retardation plate or a  $\lambda$  plate attached to the polarizing plate.

11. The polarizing plate according to claim 1, further comprising a  
5 viewing angle compensating film attached to the polarizing plate.

12. The polarizing plate according to claim 1, further comprising a  
brightness-enhanced film attached to the polarizing plate.

- Sub A1
- 10 13. A liquid crystal display comprising on at least one side of a liquid crystal cell;  
a polarizing plate comprising a polarizer, the polarizer comprising:  
a first portion having a polarization degree of 99% or more at each wavelength of light for wavelengths of 420 to 550 nm, and  
15 a second portion having a polarization degree of 99% or more at each wavelength of light for wavelengths of 550 to 700 nm,  
wherein the first portion and the second portion are laminated.
- 20 14. A liquid crystal display comprising on at least one side of a liquid crystal cell;  
a polarizing plate comprising a polarizer, the polarizer comprising:  
a first portion having a polarization degree of 99% or more at each wavelength of light for wavelengths of 420 to 550 nm, and  
25 a second portion having a polarization degree of 99% or more at each wavelength of light for wavelengths of 550 to 700 nm,  
wherein the first portion and the second portion are laminated by an adhesive.
- 30 15. A liquid crystal display comprising on at least one side of a liquid crystal cell;  
a polarizing plate comprising a polarizer, the polarizer comprising:  
a first portion having a polarization degree of 99% or more at each wavelength of light for wavelengths of 420 to 550 nm, and  
35 a second portion having a polarization degree of 99% or more at each wavelength of light for wavelengths of 550 to 700 nm,  
wherein the first portion and the second portion are laminated by a pressure-sensitive adhesive.
